PROFILE

Developer who runs the IT and builds the automation for a multi-branch bicycle retailer. I keep an Odoo ERP, an online shop and Linux servers running day to day, and I build AI-assisted tools on top of them, including a WhatsApp customer inbox inside Odoo, automated daily reports and stock and sales alerts. Comfortable across the stack (Python, Node.js/Express, PHP, SQL, HTML/CSS/JavaScript), with hands-on use of the Claude (Anthropic) API to build AI agents and automations. Strong design background from graphic design work.

EXPERIENCE

IT Manager & AI Engineer — Sep 2026 – Present
Cycle Africa Bikes · Nairobi

- Run the company's Odoo 18 ERP (point-of-sale tills across branches, stock, CRM and accounting), the WordPress/WooCommerce online shop and the Linux servers behind them.
- Built a WhatsApp-style customer inbox inside Odoo, so the customer care team answers chats in one screen, each chat lands on a CRM card, and each agent gets an automatic daily follow-up list.
- Automated daily business reporting: an evening sales and profit summary, a morning bank-deposit check and an advert-to-sale tracking report, delivered to management on WhatsApp and email.
- Built real-time alerts for stock problems (sales from the wrong shop, negative stock, stuck deliveries) and for customer advert chats left unanswered for 30+ minutes.
- Set up website uptime monitoring, nightly off-server backups of code and photos, and fixed live issues on the shop (checkout buttons, pricing errors, a recurring site outage).
- Cleaned and reconciled ERP data: merged duplicate customers and products and matched bank lines to till sales.
- Tools: Python, Odoo (ORM, custom modules, XML-RPC), PHP/WordPress, MySQL/PostgreSQL, Linux, Nginx, cron, REST APIs, Claude AI.

Graphic Design Attachee — Jul – Sep 2026 (8 weeks)
OwnTheJoke · Nairobi (hybrid)

- Produced posters and social media designs for campaigns, presenting work at weekly team demo days.

PROJECTS

PoWR — Proof of Work Reputation — github.com/Elon-maina/Git-DevMatch
Turns a developer's GitHub history into a verifiable reputation score: filters spam commits, uses Claude to score Backend, Frontend, DevOps and Systems skills, anchors proofs on the Stacks blockchain, and gives recruiters a verified talent search. Next.js, Node.js, TypeScript, MySQL, Clarity/Stacks, Claude AI.

ElonCred Smart Shop — github.com/Elon-maina/Eloncred
Online shop with product browsing, cart and integrated overdraft (buy-now-pay-later) concept. HTML, CSS, JavaScript, Node.js.

Quick Delicacies — github.com/Elon-maina/quick-delicacies-2
Restaurant menu and ordering web app with login, categories and prices. HTML, CSS, JavaScript.

SKILLS

Languages	Python, JavaScript (Node.js, Express), PHP, SQL, HTML, CSS, C
AI	Claude / Anthropic API, AI agents and automations, prompt design
Systems	Odoo ERP, WordPress/WooCommerce, Linux servers, Nginx, MySQL, PostgreSQL, Git/GitHub, Netlify

Design	Graphic design, UI/UX (Figma, Photoshop), video editing
Other	Cybersecurity fundamentals, project management, explaining technical work to non-technical teams

EDUCATION

BSc Computer Science, Egerton University — 2022 – 2026 (graduating Nov 2026)

KCSE, Karima Boys High School — B+ — 2018 – 2021

LEADERSHIP & LANGUAGES

CET Music Director; student project manager. Languages: English, Kiswahili, Kikuyu.

REFEREES

Available on request.
